Subject: Microsoft

If you don't see Microsoft as a monopoly, it is because you haven't worked in any of the companies that M\$ has forced out of business.

If you create any kind of software or method, and Microsoft decides they want your business, you are sunk because you can't compete when they own the ball, bat, and field and are giving away your products for "free".

It is going to take a genuine King Solomon to figure out what is 'fair' because no amount of money is going to bring back the businesses and livelihood that was stolen by M\$. The biggest concern of mine is preventing it from happening in the future.

Thank you,

LDL
